

Target Audience

This program is specifically aimed at persons working in the electrical industry, either trade qualified or assisting trade qualified persons.

Course Overview

This course covers the performance of rescue procedures from live Low Voltage (LV) apparatus, not including overhead lines and underground cables in the work place. It specifies the mandatory requirements of rescue from a live LV panel and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

The course covers:

- State legislation
- DRSABCD
- Identifying hazards
- Risk assessment
- Isolation
- Low Voltage Rescue Kit
- Rescue techniques
- CPR
- Automatic external defibrillator
- First Aid

Units of Competency

UETTDRRF06B	Perform Rescue From a Live LV Panel
HLTAID001	Provide Cardiopulmonary Resuscitation

NB: Training for electrical work by electrical personnel.

Duration:

1 – 2 hours Online Training
1 – 2 hours Face to face

Price

\$95.00 GST Not Applicable

Prerequisites

Nil

Assessment

1. Written Theory assessment
2. Practical face-to-face demonstration* (trainer assessed)

*PLEASE NOTE: The physical requirements of the practical demonstration include performing a minimum two minutes of CPR and use of an AED on an adult manikin on the floor and rolling a casualty onto their side. If you have any concerns in this regard, please contact us as soon as possible prior to your course

Learning Outcomes

On successful completion of this course learners will be awarded a Statement of Attainment in the listed competencies
